

1. Looks great! But the graphics are not that good. It would be great to upgrade those.
 - a. Response: Yes, the graphics were made on paint because I made the whole game all by myself and I am a developer, not a designer. But for sure on the next version I would hire someone to do the design for me.
2. The controls are not good related to physics. Everything else is good.
 - a. I did a follow up on this asking what does “not good” means.
 - b. Response: I fore sure would investigate that gravity behavior you mention while the character jumps.
 - c. Fixed some unwanted behavior.
3. The whole game looks great. But the difficulties are really difficult, even on “easy”.
 - a. Right, so I would have to make the game even easier.
